Honorable Hiring Manager,

My name is Kshitiz Shah. I am a Full-stack developer by trade. I enjoy developing web applications for any immediate problems or projects I want to pursue.

My motto as a developer is if I am the smartest person in the room, I am in the wrong room. I love learning, and want to become best developer I can be. I am a maker. I enjoy creating in my career and after hours I believe in shipping quality code and working in flow.

I have experience with peer code reviews, mentoring and pair coding sessions. I also have experience with tedious refactoring and entire re-writes of applications, large and small scale I have a history working in a remote environment (working flex and core hours), as well as working with small development teams.

I care deeply about the code I write and the effect my work has on the product. I enjoy interaction with clients and seeing the joy they get when they get the application they've been wanting.

I am a Full-stack Developer by trade, however I seem to have an eye for design and user experience. I enjoy working with UI/UX to make sure their designs are functional, accessible, and give the intended experience.

That said – I think I align with what you're doing and believe I would be a great fit technology and culture wise.

I truly hope to make a solid contribution to a team at your company, and I look forward to speaking with you in person.

Sincerely,

Kshitiz Shah
