- Has received an average of 60% in assessments
- The tutor believes the student has grasped all of the concepts and is ready to go on to the second module.

Required Textbooks

- Excel 2019 Bible
- Ctrl+Shift+Enter Mastering Excel Array Formulas
- Learn Excel 2016 Essential Skills with The Smart Method

Prerequisites

- Successfully complete the entrance test with a score of at least 40% (for trainees directly applying to this level).
- Successfully complete the DWIT Training – Level 1 course (not applicable to trainees directly applying to this level).

Course Details

Week I

Optimizing Data

- Sorting or Filtering
- Naming Ranges

Visualizing Data With Basic Charts

- Create Charts
- Modify and format Charts
- Analyzing Data with Pivot Tables, Slicers and Pivot Charts
- Resize an Image
- Create a PivotTable
- Analyze Pivot Table Data to Present Data with Pivot Charts
- Filter Data by Using Slicers

Goal Seek And Solver

- What-if Analysis Using Goal Seek
- Using Solver to complete A What-if
- Adding Constraints to Solver

Week II

Macro And Conditional Format With Custom Rules

- Apply Data Validation
- Work with form and Controls

Custom View And Scenarios

- Add Quick Access to Custom View
- Editing and Deleting Custom View
- Setting up A Set of Scenarios
- Displaying and Editing Different Scenarios

Labs

Lab assignments will focus on the practice and mastery of contents covered in the lectures and introduce critical and fundamental problem-solving techniques to the students.

Advanced: Level 3

Nature of the Course: Theory + Practical

Total Hours per Day: 2 Hours

Course Duration: 1 week

Course Summary
